

ABDUL BASITH M

Flutter Developer | Mobile App Developer

+965 66099743 | abbasith222@gmail.com | Hawally, Kuwait | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Passionate Flutter Developer with 2+ years of hands-on production app development and a strong 4+ year background in enterprise IT administration. Currently at Kpost Courier Co., Kuwait as a dual-role Flutter Developer & IT Administrator — independently architected and shipped 6+ production Flutter apps (Android, iOS & Web) used daily across the organization. Proficient in Flutter/Dart, Riverpod, BLoC, GetX, REST APIs, Firebase, Supabase, and .NET/MySQL backends with clean architecture patterns. My IT infrastructure background gives me a rare advantage in building secure, production-hardened mobile applications. Actively seeking a full-time Flutter Developer role.

TECHNICAL SKILLS

Flutter & Dart	Flutter, Dart 3.x — cross-platform Android, iOS & Web app development
State Management	Riverpod, BLoC/Cubit, GetX, Provider, setState — migrated 166-file codebase
Navigation	go_router, Navigator 2.0, deep linking, route guards
Backend & APIs	REST APIs, HTTP/Dio, JSON parsing, .NET/MySQL, Node.js/Express (basic)
Firebase	Firebase Auth, Firestore, Storage, Push Notifications, Crashlytics
Local DB	Sqflite/Drift, Hive, Isar, ObjectBox, SharedPreferences — offline-first apps
Cloud / BaaS	Supabase (auth, DB, storage), Firebase, GCP (basic)
Advanced Features	GPS/Geofencing, Bluetooth ESC/POS printing, Barcode/QR scanning, Biometric auth
Security	AES-256 encryption, JWT auth, role-based access control, FlutterSecureStorage
UI / UX	Custom widgets, 23-component reusable library, animations, RTL/Arabic, dark/light mode
Architecture	Clean Architecture, MVVM/MVC, modular folder structure, Freezed code generation
Integration	PDF generation, digital signatures, file upload, camera/gallery, OTA updates, Lottie
Tools	VS Code, Android Studio, Git & GitHub, Postman, Figma (basic), Sentry
Web & Other	HTML, CSS — prior frontend development; Docker (basic), Swagger/OpenAPI

FLUTTER PROJECTS — PRODUCTION APPS

KPOST HR Management App · Flutter · Riverpod · Firebase · MySQL

● Live — 70+ Daily Users

- Architected and shipped a full enterprise HR mobile app used daily by all Kpost Courier Co. employees across Kuwait.
- Role-based access control (Admin / HR / Employee) with JWT-secured login and session management.
- GPS attendance verification with Google Maps geofencing and automated PDF attendance report export.
- NOC request submission & multi-level approval workflow, leave management with real-time status tracking.
- Digital signature integration for asset agreements and document sign-off flows.
- Built 23-component reusable widget library; light/dark mode theming; deployed via APK to 70+ devices.

IT Asset Tracker — KPOST Internal Tool · Flutter · GetX · PHP · MySQL

● Live & In Use

- Built an internal IT asset management app for tracking all company hardware, network devices, and cabling infrastructure.
- Tracks devices by department, server rack counts, patch panel to wall mapping, and full network routes.
- QR/barcode scanner integration for fast device lookup; role-based access for IT staff.
- Replaced manual spreadsheet tracking — gives real-time visibility of all IT assets across the organization.

Document Keeper — Secure Vault App · Flutter · AES-256 Encryption · Biometric Auth

✓ Completed

- Secure document storage app with AES-256 encryption and biometric (fingerprint/face) authentication.
- Users can store, organize, and access sensitive documents (IDs, certificates, contracts) in an encrypted local vault.
- FlutterSecureStorage for key management; camera/gallery integration for document capture and upload.

Billing App — POS System · Flutter · BLoC · Bluetooth ESC/POS Printer

✓ Completed

- Point-of-sale billing application with Bluetooth thermal printer integration (ESC/POS protocol).
- Barcode/QR scanner for product lookup; invoice generation with PDF export and print-to-receipt functionality.
- BLoC state management for cart, product catalog, and transaction history management.

My Bachelor Rooms — Manage Expense · Flutter · Riverpod · Supabase **Live & In Use**

- Room and accommodation listing app targeted at bachelor expats in Kuwait searching for shared accommodations.
- Supabase backend for real-time listings, user authentication, and image storage.
- Riverpod state management with clean architecture; location-based filtering and contact integration.

KACT Charity App · Flutter · Firebase · fl_chart **In Progress**

- Charity and donation management app with campaign listings, donor tracking, and real-time analytics dashboard.
- Firebase Firestore for real-time data sync; fl_chart for donation statistics and campaign progress visualization.
- Push notifications for campaign updates and donation confirmations.

Note-Taking App (Model note) · Flutter · SQLite **Completed**

- Offline-first notes app with local SQLite persistence — create, edit, delete, and search notes without internet.

WORK EXPERIENCE

Flutter Developer (Production Apps) | **Kpost Courier Co.** Jun 2023 – Present | Kuwait

- Architected and shipped 6+ production Flutter apps across Android, iOS & Web used in daily company operations.
- Led full GetX → Riverpod + go_router migration across a 166-file codebase with zero production regressions.
- Built GPS attendance with Google Maps geofencing, Bluetooth ESC/POS thermal printer, and barcode scanning integration.
- Implemented AES-256 encryption + biometric vault and role-based permission gating across all apps.
- Designed 23-component reusable widget library reducing feature delivery time significantly.
- Handled full app lifecycle: requirements, UI/UX, development, testing, APK deployment to 70+ devices.

IT Administrator | **Kpost Courier Co.** May 2023 – Present | Kuwait

- Sole IT Administrator managing all technology for Kuwait's high-security ATM card delivery courier operation.
- Manage Windows Server, Active Directory, 70+ Android devices (AirDroid MDM), Grandstream IP PBX, Hikvision CCTV.
- Full network infrastructure: routers, managed switches, VLANs, VPN, Synology NAS, Veeam BDR, Xenserver VMs.
- Full IT procurement ownership — research, vendor negotiation, and purchasing of all company IT assets.

IT Support Engineer | **Syrma SGS Technology** Feb 2022 – Feb 2023 | Bangalore, India

- L1/L2 desktop and helpdesk support for 100+ users in a large electronics manufacturing environment.
- Configured Windows OS, Office 365, routers, switches, LAN cabling, antivirus, and asset inventory management.

Desktop Support Engineer | **Oqtis Soft Pvt Ltd** Jul 2021 – Jan 2022 | India

- On-site and remote support for 40+ clients across hardware, software, and network troubleshooting.

Frontend Developer (Junior) | **Earlier Role** 2020 – 2021 | India

- Built and maintained web UI using HTML and CSS — foundational experience that transitioned into Flutter development.

EDUCATION

BSc Information Technology	Jamal Mohamed College, Trichy (Bharathidasan University)	2017 – 2020
PG Diploma in Computer Applications	Tamil Nadu Advanced Technical Training Institute	Certified

WHAT I BRING

- 6+ production apps — live & in daily use
- Full-stack: Flutter + backend APIs
- AES-256, biometric & JWT security
- Riverpod/BLoC clean architecture
- GPS, Bluetooth & hardware integration
- Self-taught, fast learner
- Production IT background — secure apps
- Available for immediate joining
- Open to freelance or full-time
