

ABDUL BASITH M

Flutter Developer | Mobile App Developer

+965 66099743 | abbasith222@gmail.com | Hawally, Kuwait | GitHub | Portfolio

PROFESSIONAL SUMMARY

Passionate Flutter Developer with hands-on experience building cross-platform mobile applications from scratch. Have independently designed, developed, and deployed multiple Flutter apps with real-world use — including a full HR management system currently live and in active use at Kpost Courier Co., Kuwait. Proficient in Flutter/Dart, REST APIs, Firebase, Supabase, and PHP/MySQL backends. Complemented by a strong 4+ year background in IT infrastructure and systems, bringing a rare combination of development skills and deep technical understanding of production environments. Actively seeking a Flutter Developer role to transition fully into mobile app development.

TECHNICAL SKILLS

Core	Flutter, Dart — cross-platform iOS & Android app development
State Mgmt	GetX, setState, Provider — state management and navigation
Backend / APIs	REST APIs, HTTP/Dio, JSON parsing, PHP/MySQL, Node.js (basic)
Firebase	Firebase Auth, Fire store, Firebase Storage, Push Notifications
Local DB	SQLite, Shared Preferences — offline-first app data management
Cloud / BaaS	Supabase (auth, database, storage), Firebase, GCP (basic)
UI / UX	Custom widgets, reusable components, light/dark mode theming, responsive layouts
Architecture	MVC / MVVM, Clean folder structure, Modular & scalable code
Auth & Security	JWT, login/signup flows, role-based access control, session management
Integration	PDF generation, digital signatures, file upload, camera/gallery, deep linking
Tools	VS Code, Android Studio, Git & GitHub, Postman, XAMPP, Figma (basic)
Web Skills	HTML, CSS — prior frontend development experience

FLUTTER PROJECTS

HR Management App — Kpost Courier Co. | Flutter + Firebase + MySql Live & In Use

- Built and deployed a full HR mobile application used daily by Kpost Courier Co. employees across Kuwait.
- Implemented role-based access control (Admin / HR / Employee) with secure login and session management.
- Features include: NOC request submission and approval workflow, leave management with status tracking, and digital signature integration for document sign-off.
- Backend powered by Firebase and Supabase for real-time data sync and file storage.
- Designed clean, intuitive UI with custom widgets and light/dark mode theming.

Task Management App | Flutter + Firebase + Supabase Live & In Use

- Built a full-featured task management application with Flutter frontend and PHP/MySQL REST API backend.
- Implemented user authentication (login/signup), per-user task management, task status updates, and task filtering.
- Designed RESTful API in PHP with secure JWT-based authentication and MySQL database integration.
- Clean MVVM architecture with GetX state management and centralized theming.

Note-Taking App (Model note) | Flutter + SQLite Completed

- Developed a local-first note-taking app using Flutter and Sqflite for offline data persistence.
- Features include: create, edit, delete, and search notes — all stored locally on device without internet dependency.
- Implemented clean folder structure and reusable widget components for scalability.

Authentication System with PHP/XAMPP Backend | Flutter + PHP + MySQL Completed

- Built a complete login and signup system with Flutter frontend connected to a PHP/XAMPP REST API backend.
- Implemented secure API connection, form validation, error handling, and session token management.
- Foundation architecture used as the base for larger Flutter + backend projects.

WORK EXPERIENCE

IT Administrator (Flutter Developer — In-house)

May 2023 – Present | Kpost Courier Co., Kuwait

- Designed, developed, and deployed a Flutter HR application used daily across the entire organization.
- Independently handled full app lifecycle: requirements gathering, UI/UX design, development, testing, and deployment.
- Integrated Firebase, Supabase, and REST APIs for backend connectivity and real-time operations.
- Also manage full IT infrastructure — bringing strong understanding of production environments, networking, and server systems that directly benefits app architecture decisions.

Frontend Developer (Junior)

2020 – 2021 | Earlier Role, India

- Built and maintained web interfaces using HTML and CSS — foundational experience in UI development that transitioned into Flutter.

EDUCATION

BSc Information Technology	Jamal Mohamed College, Trichy — Bharathidasan University	2017 – 2020
-----------------------------------	--	-------------

WHAT I BRING

- Real app built & deployed (not just tutorials)
- Full-stack: Flutter + backend APIs
- Firebase, Supabase & cloud integration
- Role-based auth & security flows
- Clean architecture & scalable code
- Self-taught, fast learner, highly motivated
- Production IT background — understands real systems
- Available for immediate joining
- Open to freelance or full-time roles

ADDITIONAL INFORMATION

Nationality:	Indian
Location:	Hawally, Kuwait — Open to Kuwait, remote, or international roles
Languages:	English, Tamil, Hindi, Arabic(Basic)
Availability:	Immediate
